

World's 1st Smart Wi-Fi Marketplace

Transforming Physical Venues
into Intelligent Spaces

Hoopoe Digital is a pioneer in **Spatial Intelligence** — a **Gen-AI** field focused on transforming **Physical Venues** into, data-driven, **Intelligent Spaces**. Unlike traditional smart venues, Intelligent Venues interact with visitors, offer services, answer questions, and respond in real time —creating human-like engagement with the environment.

Using **Smart Wi-Fi** — which leverages the venue's existing infrastructure — alongside **Digital Twin** and other **AI technologies**, we enable seamless interaction, enhanced experiences, and intelligent operations within physical spaces.

About Hoopoe Digital

Enabling Spatial Intelligence Across Global Markets

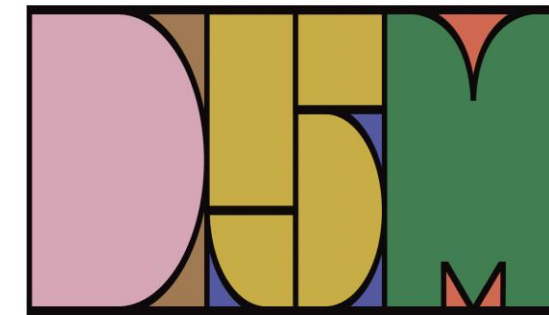

From our HQs in Egypt, Hoopoe Digital has expanded its innovative solutions across the Middle East, Europe and North America. With established offices in the Netherlands, KSA, UAE and Qatar (UK and Canada are in the make), Hoopoe Digital is bringing intelligent spaces to life across diverse markets and cultures.

Customers Trust

Hoopoe

Our solutions power some of the world's most prestigious venues. Major shopping destinations like District 5 Mall by MARAKEZ, Top F&B chains like McDonald's, Burger King and Café Vergnano, famous events like TechForge, VC Summit and RISEUP Summit rely on Hoopoe's intelligent solutions to enhance visitors' experience and operational efficiency.

Strategic Partners & Integrations

Hoopoe Digital cultivates strategic alliances and integrations with Telecomm Service Providers, Network Hardware Providers, POS, ERP, CRM and DPI Systems to deliver fully integrated solutions.

Moreover, we partner with leading resellers and distributors across our markets, including trusted names like Ooredoo and others known for their excellence and high standards.

Enterprise-Grade Infrastructure & Compliance

Hoopoe solutions operate on a secure, enterprise-grade cloud infrastructure that supports multi-cloud, hybrid cloud and on-prem deployment. Hoopoe's cloud is architected for automatic scalability, high redundancy with failover servers and load balancing, and exceptional availability with minimal downtime.

As we process sensitive location and behavioral data, Hoopoe maintains strict compliance with regional, as well as international, regulations including GDPR, CCPA, Saudi PDPL and Egypt DPL. This enterprise foundation ensures we deliver both the performance and trust required for mission-critical intelligent space applications.

Scale of Impact

Our **Smart Wi-Fi** Solutions process an extraordinary volume of interactions across thousands of access points, each delivering multiple subscription services simultaneously.

This extensive infrastructure captures millions of data points daily from registered and unregistered users, fueling our analytics engine with rich behavioral insights. These engagement metrics confirm Hoopoe Digital's position as the region's definitive leader in **Spatial Intelligence**.

Recognitions & Achievements

🏆 Global Recognition: In October 2024, Hoopoe Digital was honored by the World Innovation, Technology and Services Alliance (WITSA) as one of the top 14 most innovative startups worldwide, solidifying our position as a global tech leader.

🏆 Continental Innovation Award: In December 2024, Hoopoe Digital's CEO was awarded AfICTA's Innovation Award of the Year for driving groundbreaking advancements in AI-driven Smart Wi-Fi solutions across Africa.

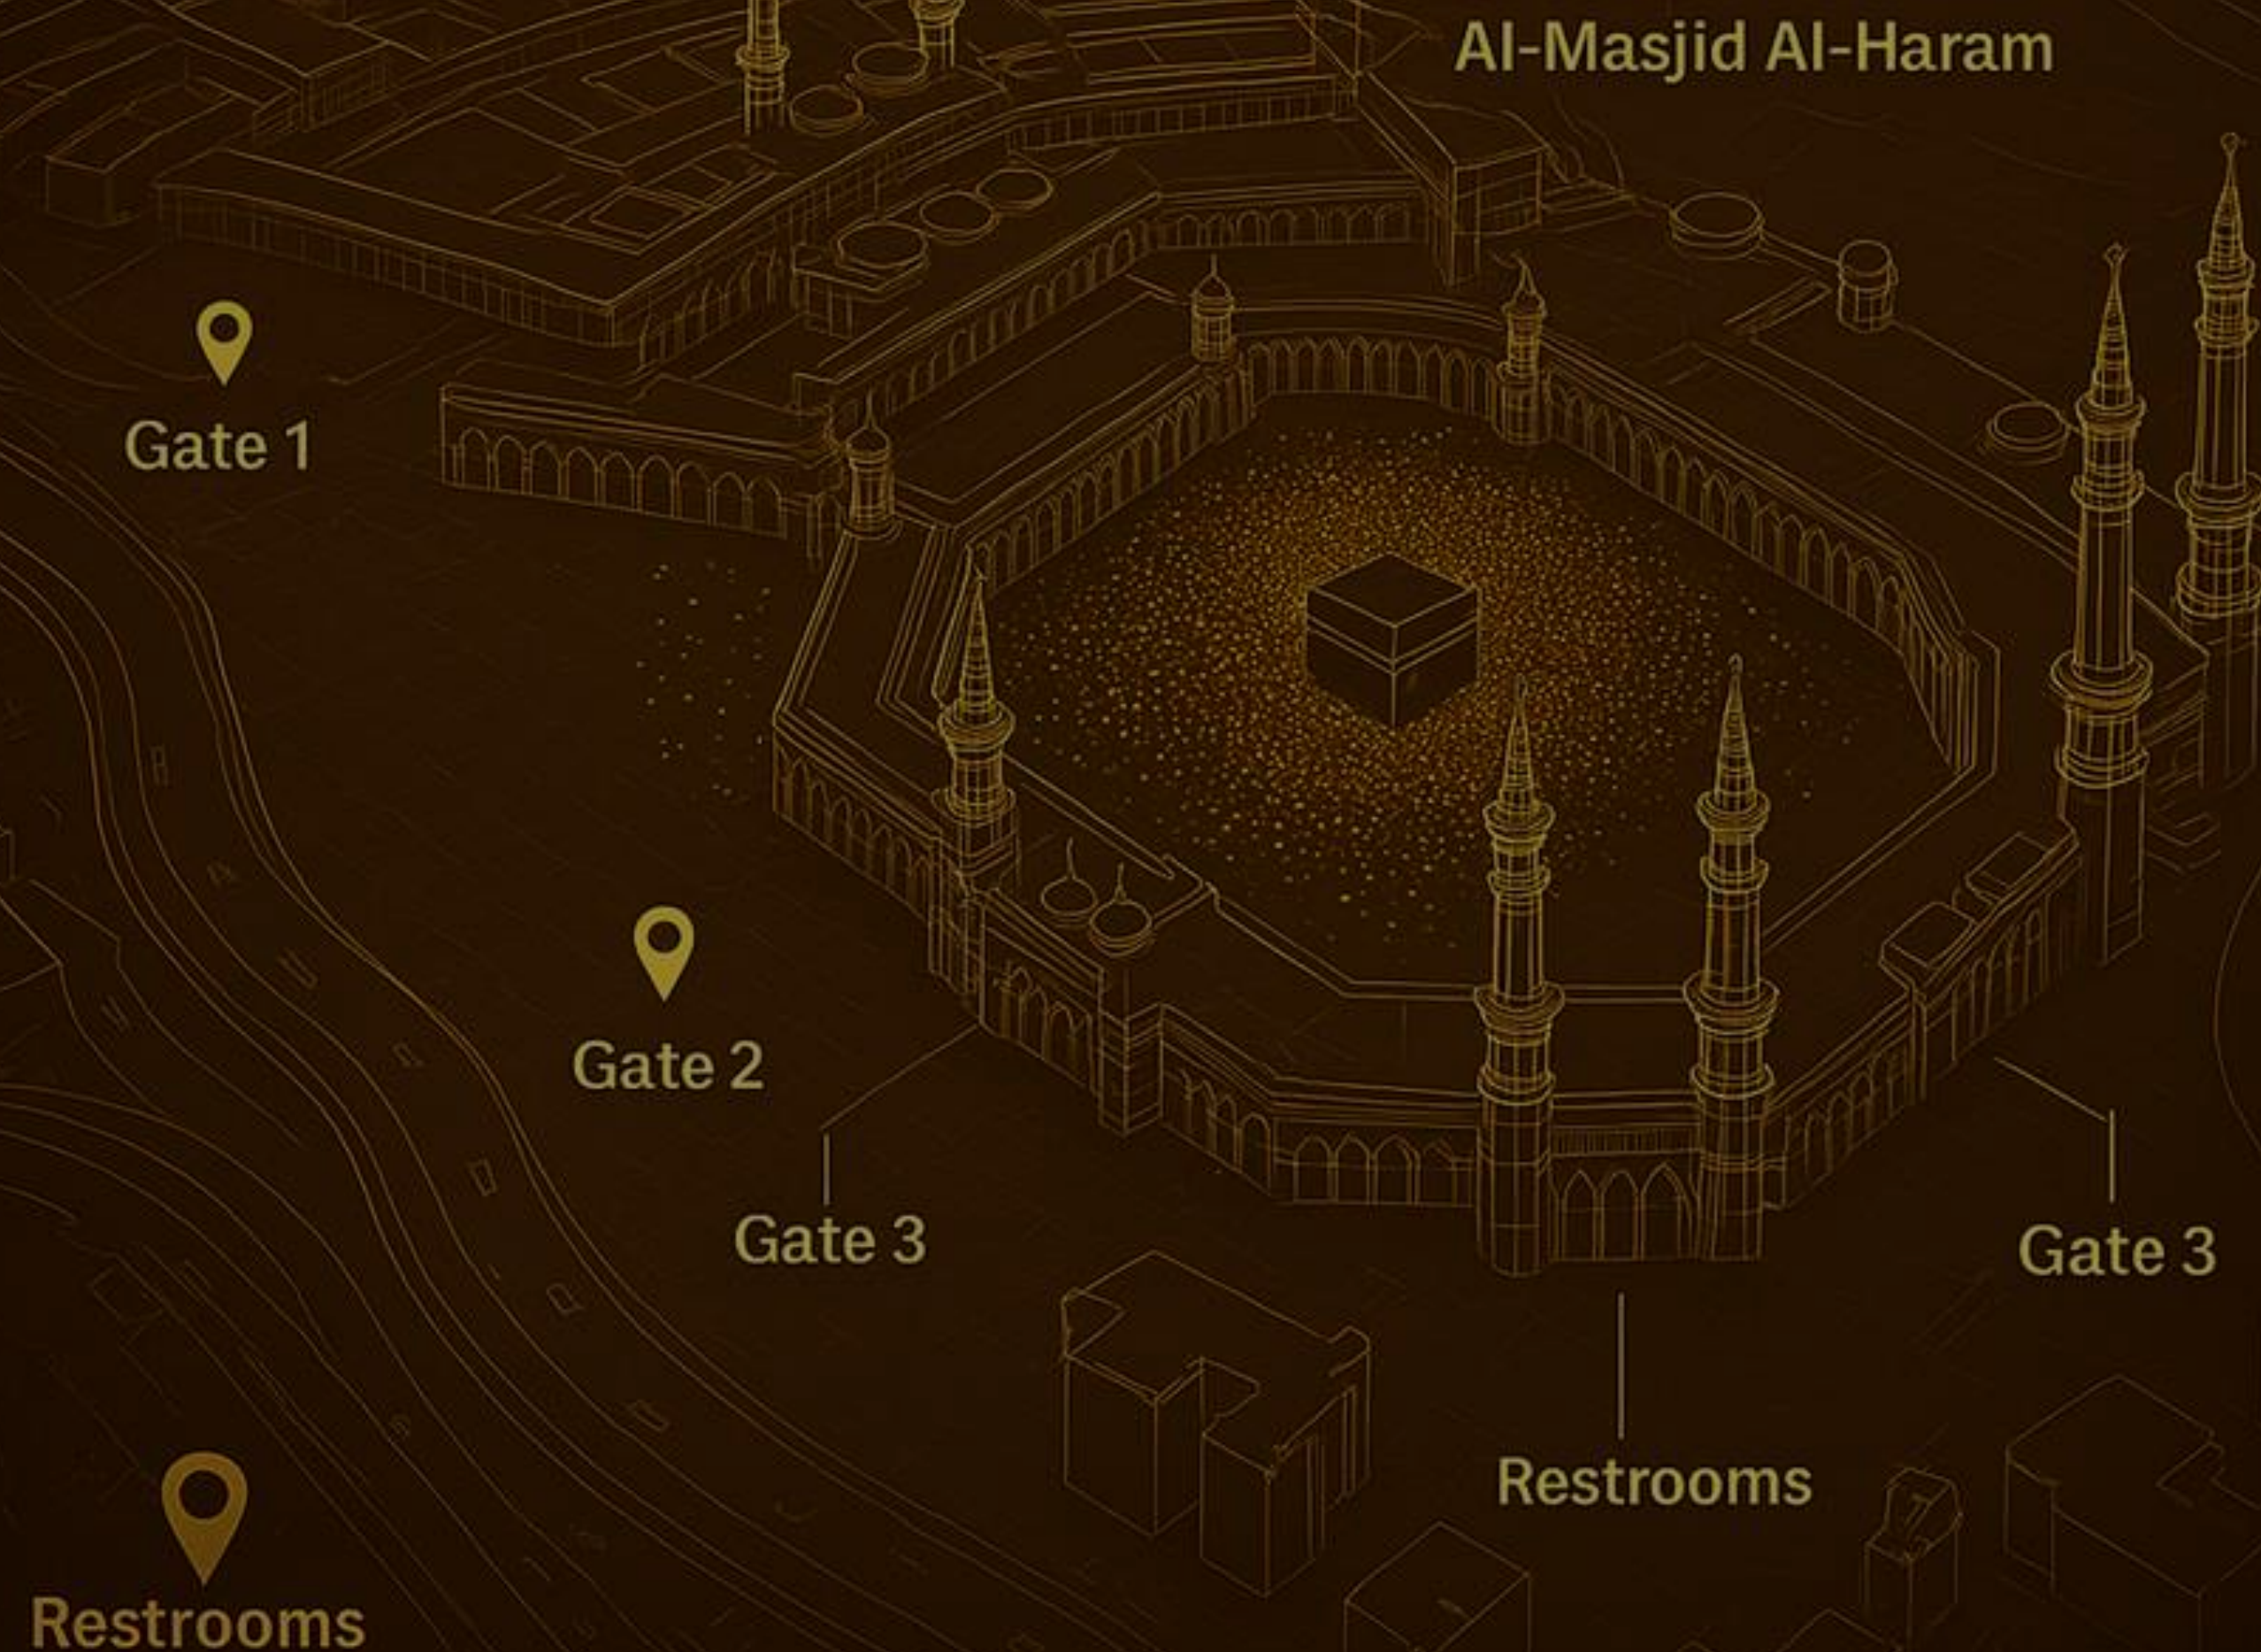

🏆 National Excellence: In November 2023, Hoopoe Digital was recognized as one of Egypt's top technology startups at CairoICT, affirming our impact on the region's tech ecosystem.

Recognitions & Achievements

Hajj & Umrah Challenge

In April 2025, Hoopoe Digital was proudly recognized as one of the top three winners of the prestigious **Umrah Challenge** — an international innovation competition held in Al-Madinah Al-Monawarah, Saudi Arabia. Competing against 150 leading technology companies from around the world, our team was honored for presenting a groundbreaking project: an **"Smart WiFi-based Integrated Functional Digital Twin for Al-Harameen"**

Customer Segments

While our technology adapts to any physical environment, we developed specialized expertise across these key segments. Though, our agile development approach allows us to rapidly customize solutions for emerging venue types, beyond these segments, ensuring any physical space can join the intelligence revolution.

The Smart Wi-Fi Revolution

Wi-Fi is the ideal foundation for spatial intelligence—present in virtually every venue but vastly underutilized beyond basic connectivity.

Hoopoe Digital unlocks Smart Wi-Fi's hidden potential by transforming passive network signals into actionable business intelligence, capturing rich behavioral insights and demographic data from all visitors—whether they connect or not—monitoring movements, engagement patterns, dwell times and more without requiring a single piece of additional hardware.

Wi-Fi Instant Applications

Our revolutionary location-intelligent, WiFi Instant Applications appear automatically on connection and vanish upon disconnection—zero downloads required. This frictionless approach not only boosts engagement but captures behavioral data crucial to train physical venues AI models.

Third Party Integrations

By integrating with venues 3rd party systems, e.g. POS, ERP, queuing, booking, ticketing systems and external streaming sources, we create a comprehensive data ecosystem that continuously enriches venues intelligence, transforming them to environments that learn and adapt over time.

WiFi Smart Services (B2B)

Empower venue operators with powerful hotspot management tools

WiFi Instant Applications (B2B2C)

Offer venue visitors transformative location-intelligent instant apps – no download needed.

WiFi Business Intelligence

Transform location data into business insights with comprehensive analytics & predictive dashboards

WiFi Location-Intelligent Marketing

Target venue visitors with location-intelligent campaigns using Hoopoe Ad Manager platform.

Wi-Fi Business Intelligence

Hoopoe Digital's Business Intelligence leverages WiFi as the most powerful data source capturing insights even from unconnected or passive devices, all while preserving user anonymity. Businesses gain access to vital BI charts like footfall trends, dwell time, visit frequency, zone heatmaps, and customer journey flows for smarter decisions.

Basic Wi-Fi Analytics

Users, devices, sessions, PII, live & historical highlights.

Hoopoe Ad Manager

Hoopoe Digital's Ad Manager is the world's first Stand-alone Wi-Fi Ad Manager. Pretty much similar to Google Ad Manager and Meta Ads Manager. Yet, It intelligently targets Wi-Fi users by their location, the instant apps they use and based on the factual and behavioral user data captured through WiFi.

Locations Campaigns Assets Audience Performance Payments

Modern Guest Wi-Fi

Hoopoe's centralized Wi-Fi Management Cloud (WMC) platform offers a one-stop-shop for creating and managing Guest Wi-Fi networks.

From enabling the creation of fully branded modern splash pages, to selecting user authentication methods (phone number, social login, vouchers, email address, etc.) to creating user packages (speed, quota, session duration, access windows, etc.), to managing the service (de-authenticating users, blocking users, changing offers, etc.), blacklist/whitelist URLs. Simply, dealing with your Hotspot as if you are a Mobile Network Operator.

Suitable for:

All types of Public Venues

Public Transportation

Biz Parks

Cloud-AAA as a Service

Hoopoe Digital's Cloud-AAA delivers enterprise-grade RADIUS infrastructure for robust Authentication, Authorization and Accounting, pretty much like Cisco Identity Service Engine (ISE). It can optionally be used “completely independent” of our Splash Page solution.

Hoopoe Digital's [Cloud-AAA as a Service](#) supports all major EAP protocols (EAP-TLS, EAP-TTLS, PEAP, EAP-SIM, EAP-AKA, EAP-FAST, EAP-GTC, EAP-MD5) and Hotspot 2.0 implementation, ensuring seamless, secure connectivity with carrier-grade reliability and scalability.

Suitable for:

Enterprises

Network Operators

Solutions Providers

System Integrators

Indoor Tracking & Positioning

Hoopoe Digital's WiFi-powered Indoor Tracking and Positioning System delivers real-time tracking of visitors and assets without additional hardware - enabling comprehensive visibility into shoppers' journeys throughout malls, passengers' movements across airports, and the precise location of critical equipment in hospitals and stores—all with pinpoint 1-to-3-meter accuracy.

Our ITP service transforms venue management by optimizing spaces and operations, enabling data-driven pricing for premium advertising placements, and creating tailored visitor experiences that drive engagement and revenue.

Suitable for:

Shopping Malls

Hospitals

Airports

Museums

Exhibitions

Stations

Resorts

Enterprise

Wi-Fi in Public Transportation

Hoopoe focuses on delivering high-quality Free Wi-Fi in both public and private transportation, turning commute time into a better experience.

Unlike stationary setups, in-transit Wi-Fi requires specialized solutions. In Hoopoe, we offer turnkey systems with hardware that also enables fleet tracking, along with multi-SIM aggregation, remote management, failover support, and more.

The service is fully integrated with Hoopoe Ad Manager to offer fleet owners and operator a new revenue stream for their business.

Suitable for:

Trains

Buses

Limos & Taxis

Metros

Airplanes

Wi-Fi 3rd Party Integrations

Hoopoe Digital delivers seamless connectivity across business platforms through extensive third-party integrations. Our solution interfaces with multiple :

- POS & ERP systems (13+ brands)
- CRM Systems
- Deep Packet Inspection (DPI) tools.
- Entertainment & Music Applications like Spotify
- Reservation & Queuing systems.
- Access Control & Monitoring Systems
- And more based on “customer demands”.

Creating a unified digital ecosystem that enhances operational efficiency and user experience.

Wi-Fi Intelligent Menu

Transform dining experience with Hoopoe's Intelligent Menu—an AI system that learns customer preferences across all venues creating personalized experiences without requiring custom app development.

Seamlessly integrating with your existing POS, our system automatically populates a branded interface perfectly matched to your establishment's style. Customers simply connect to WiFi to access an interactive menu tailored to their tastes.

The platform enables frictionless ordering and payment while building comprehensive customer profiles creating powerful loyalty opportunities through personalized recommendations that drive revenue through intelligent upselling.

Suitable for:

Restaurants

Cafes

Food Courts

Drive Thru's

HEPlex

Step into a world of limitless entertainment with Hoopoe Entertainment Plex (HEPlex)—your private Netflix-like experience delivered directly through local WiFi.

Upon connecting to our dedicated network, guests unlock instant access to a premium movies, TV series, music, and immersive multiplayer games—all without internet connectivity or data charges.

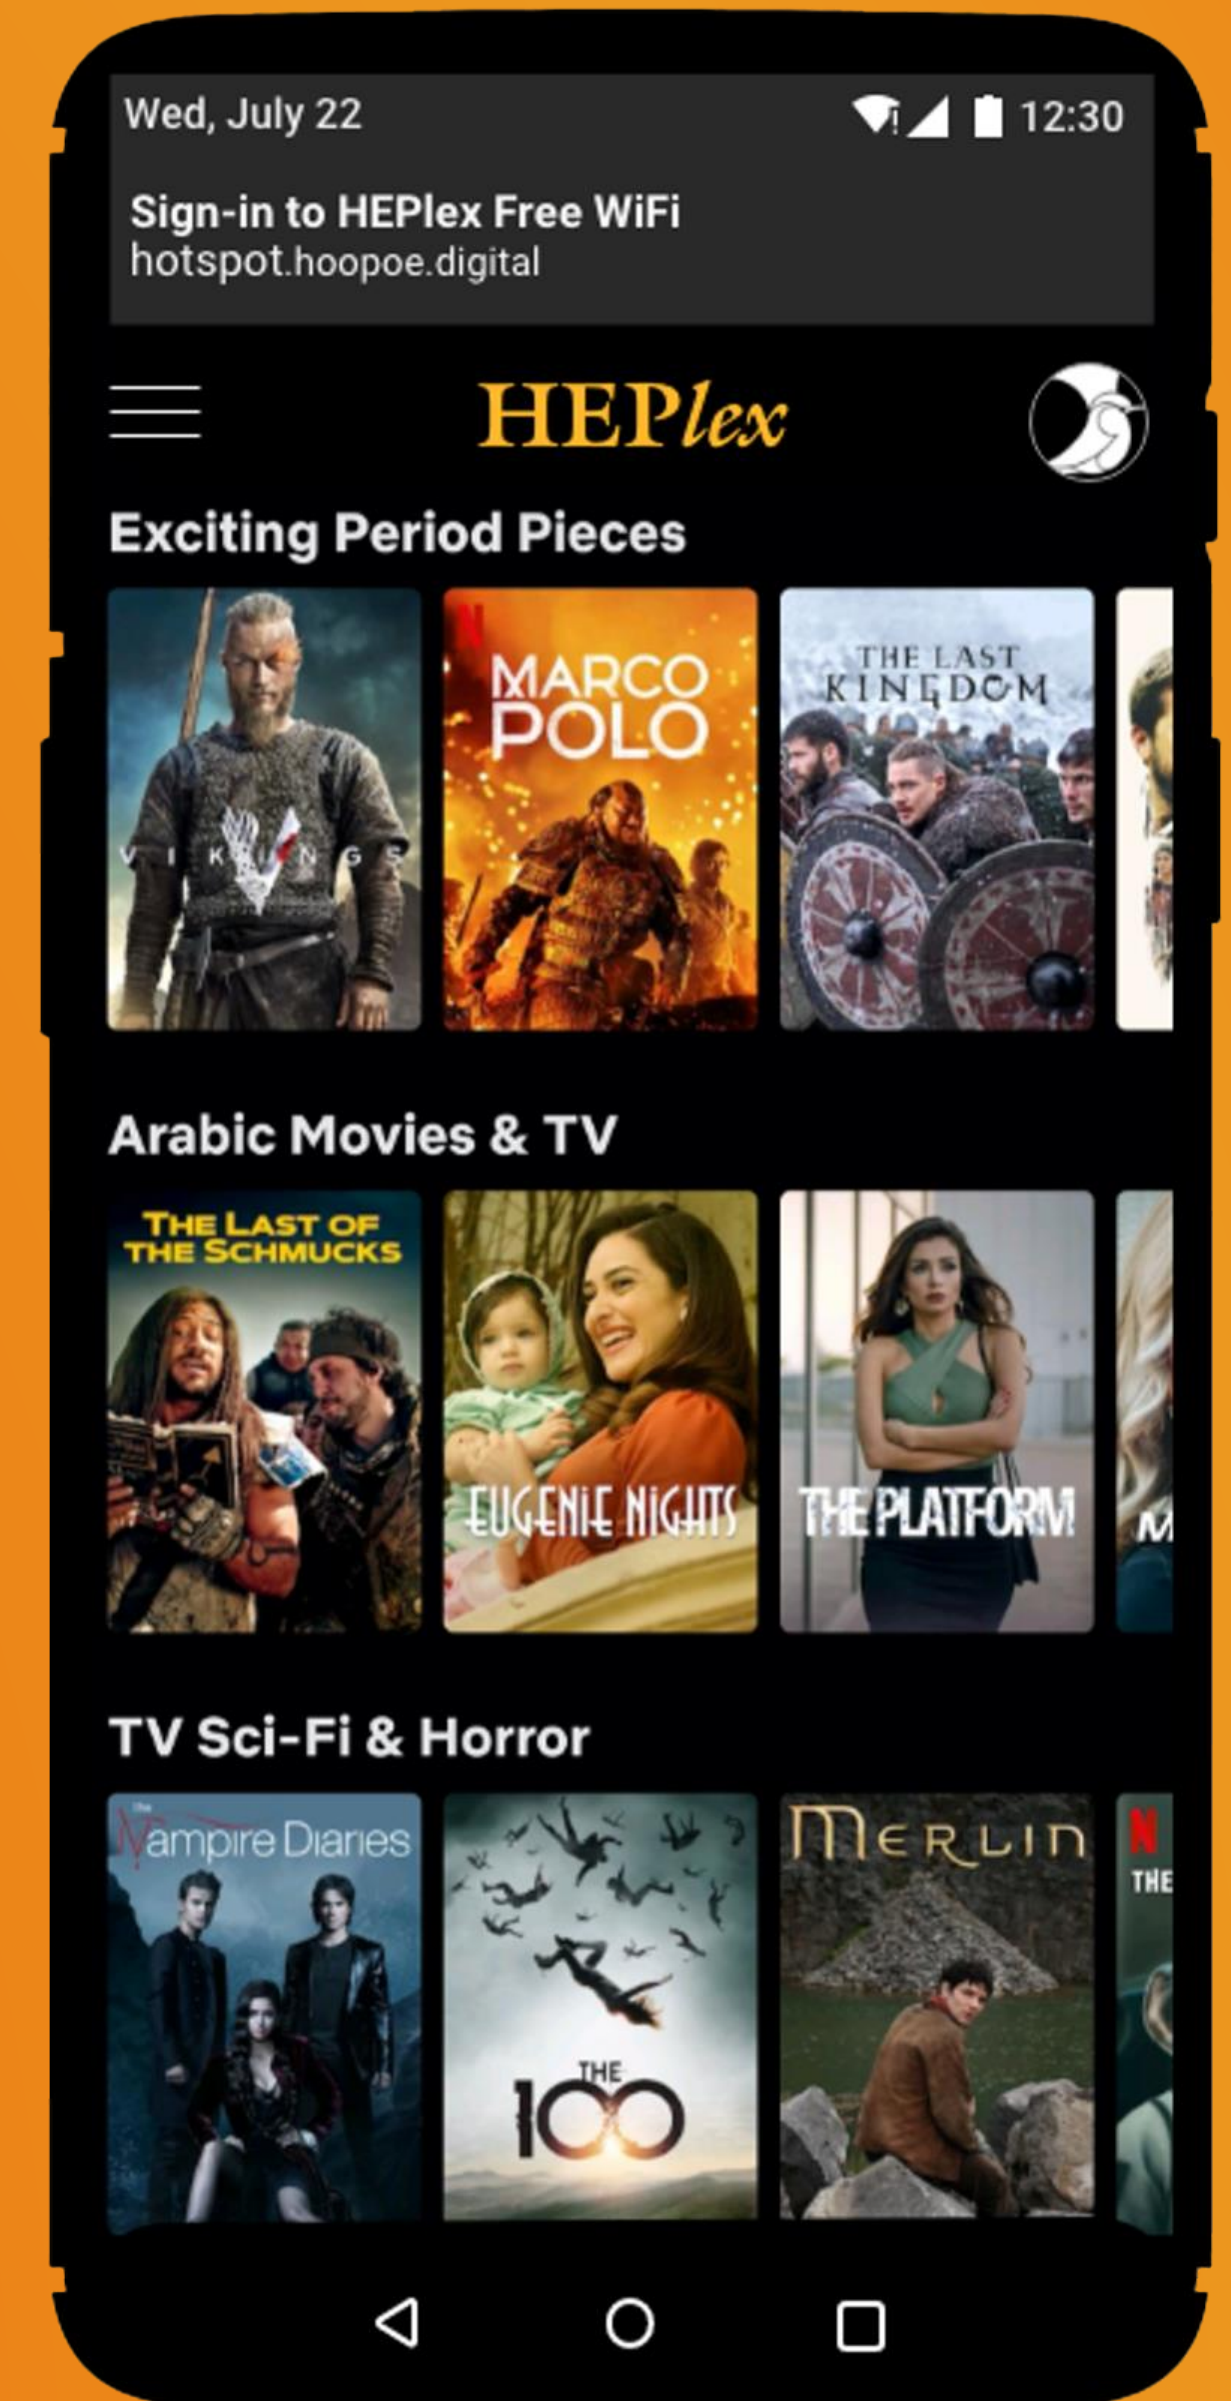

HEPlex transforms any space into an entertainment hub while creating engagement opportunities through our seamlessly integrated Ad Manager platform. Captivate audiences with quality content while delivering targeted promotions that drive revenue.

Suitable for:

Transportation

Hospitality

Waiting Areas

Indoor Mapping & Wayfinding

Hoopoe Digital develops super intuitive 3D Digital Interactive Indoor Maps for your venue. Our advanced mapping toolchain delivers highly accurate, multi-floor maps in just 1–2 weeks—regardless of venue size or complexity. These maps capture fine details, from restroom mirrors to theater seat counts.

Our wayfinding system supports two modes:

- **Live Navigation (Blue Dot):** Like Google Maps indoors, it uses WiFi to locate users with sub-meter accuracy.
- **Dynamic Navigation:** Works without WiFi; users manually enter start and end points to get a route.

Suitable for:

Shopping Malls

Airports

Museums

Campuses

Intelligent Queuing (Doarak)

A hardware-less, paper-less, touch-less, hygiene, fully integrated Intelligent Queuing System.

Doarak works as a stand-alone system, maintaining backward compatibility, and can also be integrated with existing queuing systems to give them a Digital Interface.

Hoopoe Digital uses Machine Learning to provide insights about estimated waiting time and serving time for every service. “Doarak” also provide a Smart Remote Notification system to remind users with their turns via SMS, WhatsApp or Automated Voice Calls

Suitable for:

Banks

CS Centers

Post Offices

Hospitals

Clinics

DMV

Wi-Fi Digital Jukebox

Hoopoe's Jukebox re-invents the old-days Jukebox with today's technology. With one click, your customer can select his/her favorite song, from your playlist, and play it to the whole venue.

Hoopoe's Jukebox is most suitable for restaurants & cafes, pubs, clubs, malls and all types of recreation venues.

It can be integrated with various types of loyalty programs to give your customers a gamifying experience.

Suitable for:

Restaurants

Cafes/Pubs

Clubs

Basic Wi-Fi Analytics

Hoopoe collects Personally Identified Data (PID) about registered users. It also contains information about users' devices, e.g. brand, model, OS, browser, etc. For authenticated users, Hoopoe collects sessions info, e.g. accepted/rejected sessions, number of sessions (daily, weekly, monthly, custom) average session duration (daily, weekly, monthly, custom), quota consumption, application access time and more.

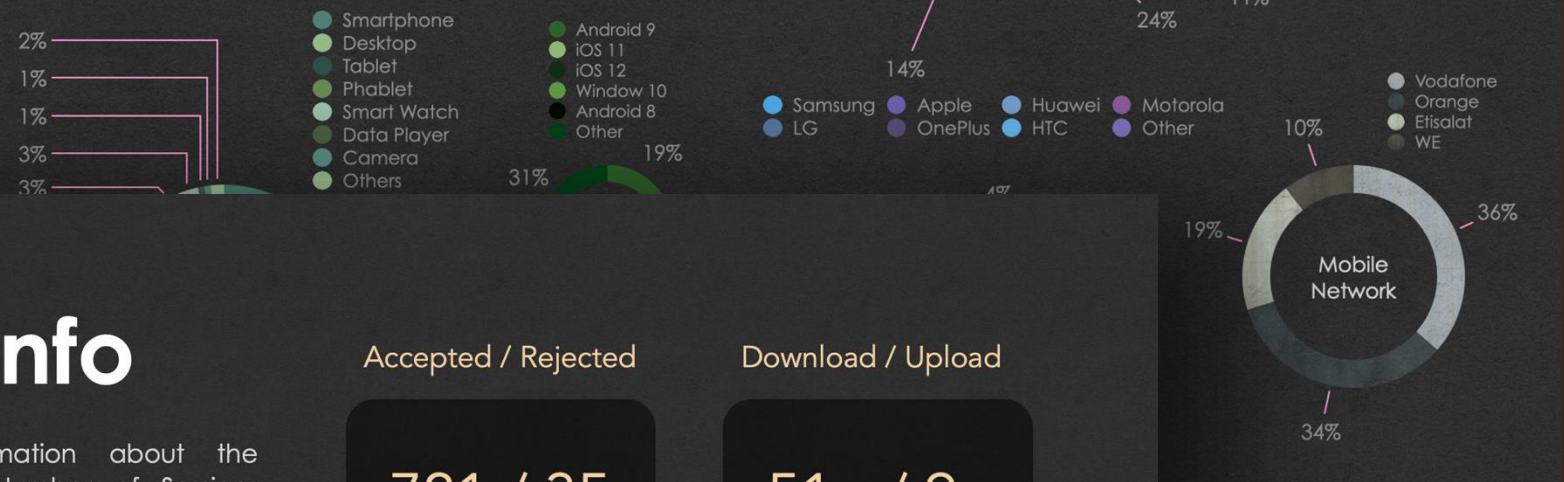

Users Data

The User Data Hoopoe Digital collects include, but not limited to, User's Name, Gender, Age Group, Language, Nationality, Verified Phone Number, Social Accounts, Number of Owned Devices and more.

Full Name	USER ID	Gender	Age Group	Lang/Nationality	Device	Registration Area	Reg. Date	Reg. Time
احمد فتحي	+201022121415	♂	18 to 28	AR / EG	iPhone 13	Food Court Entrance1	May 10, 2022	20:12:11
احمد سليمان		♂	29 to 45	AR / UAE	Samsung Note 10	Mall Concourse 7	May 10, 2022	19:52:30
Samir Abdelwhap	+201066249666	♂	29 to 45	AR / KSA	OnePlus 9	Front of Gate 3	May 10, 2022	19:05:13
Engi Wadie	+201223858307	♀	Less than 18	EN / EG	iPhone 11	Besides Lefties	May 10, 2022	18:45:28
Amany Asim		♀	18 to 28	EN / EG	Samsung A50	Inside Penny's	May 10, 2022	18:42:22
Silvia Fernandez		♀	18 to 28	SPAN / MEXICO	Huawei Mate 30	CINEMA - Hall 8	May 10, 2022	18:40:03

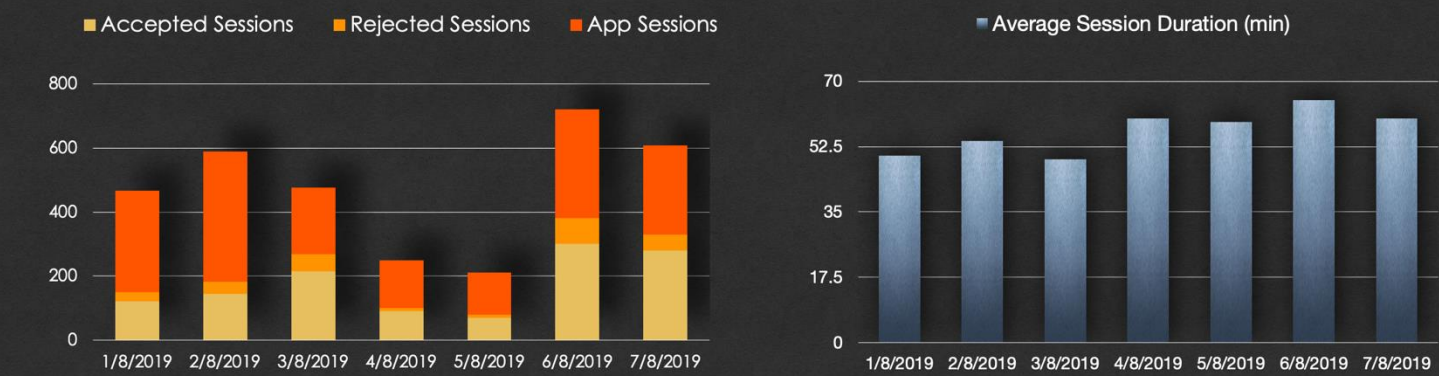

Devices Info

Hoopoe Digital acquires varies information about the User's Device, e.g. Device Manufacturer/Brand, Device Type, Device Model, Operating System and its Version, Browser and its Version, Device MAC Address and more.

Sessions Info

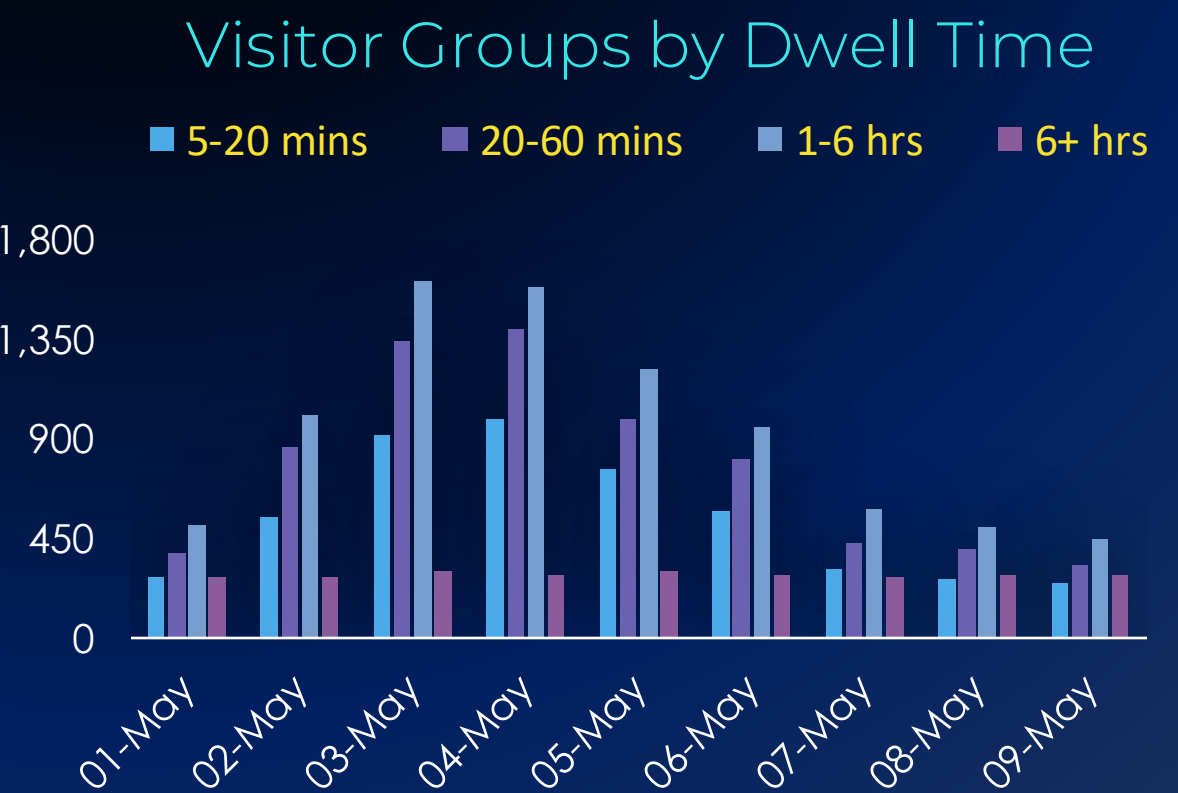

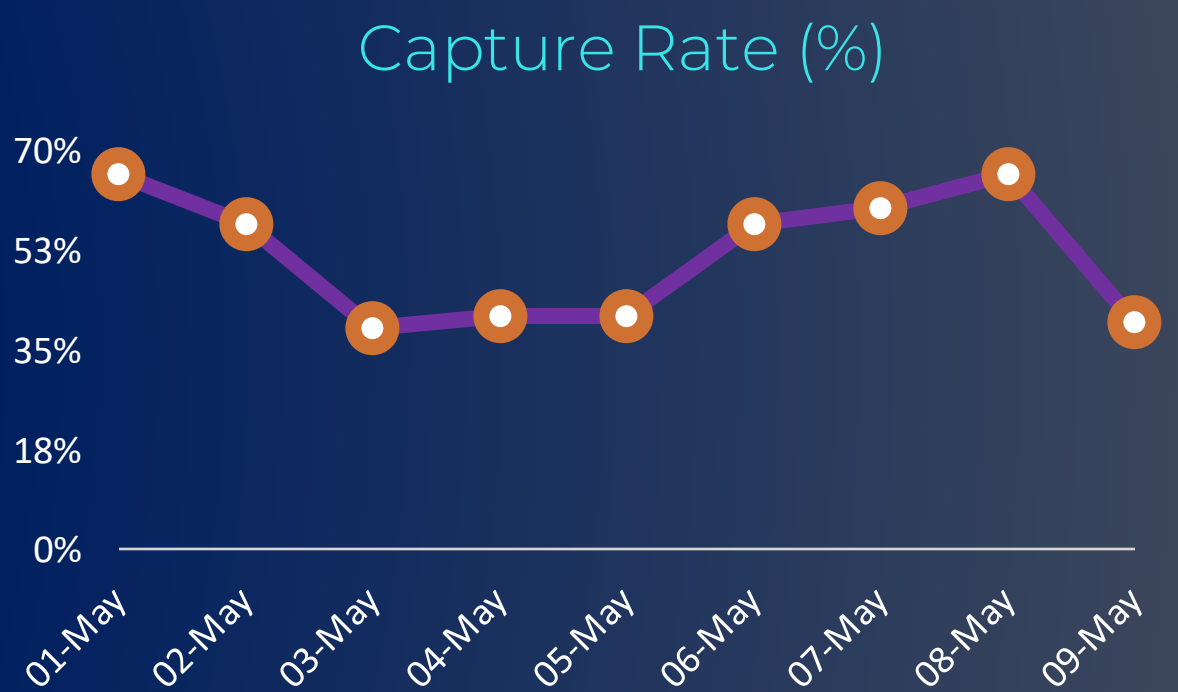

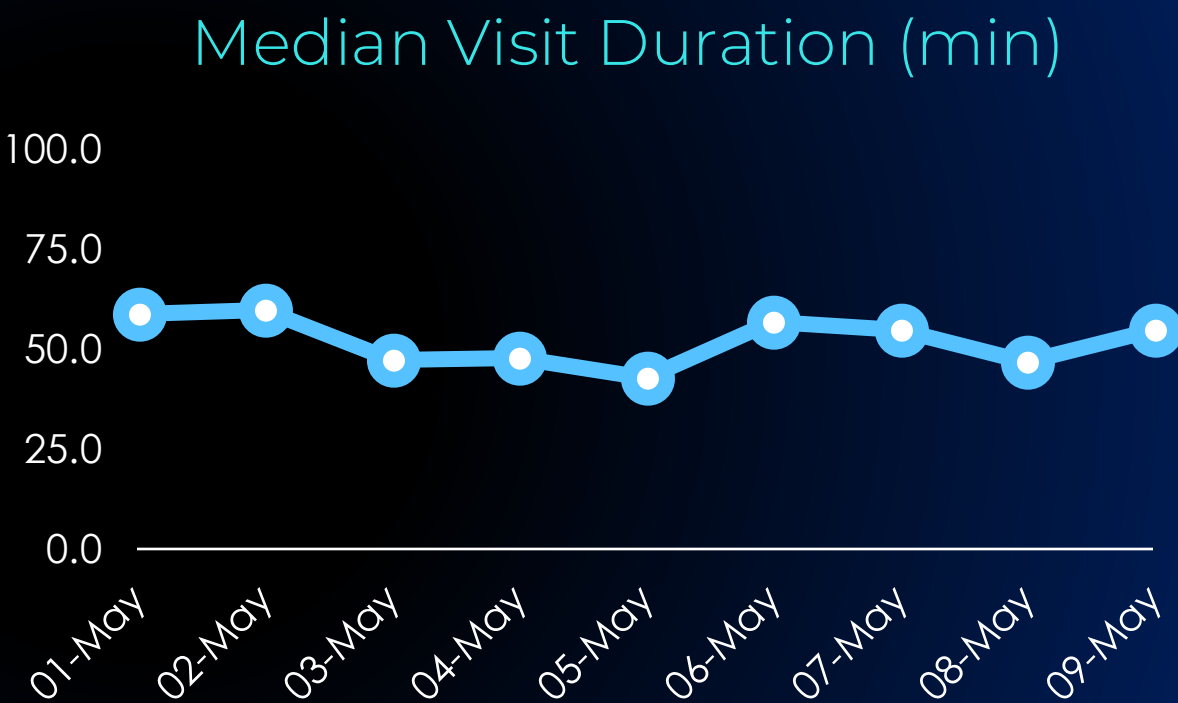

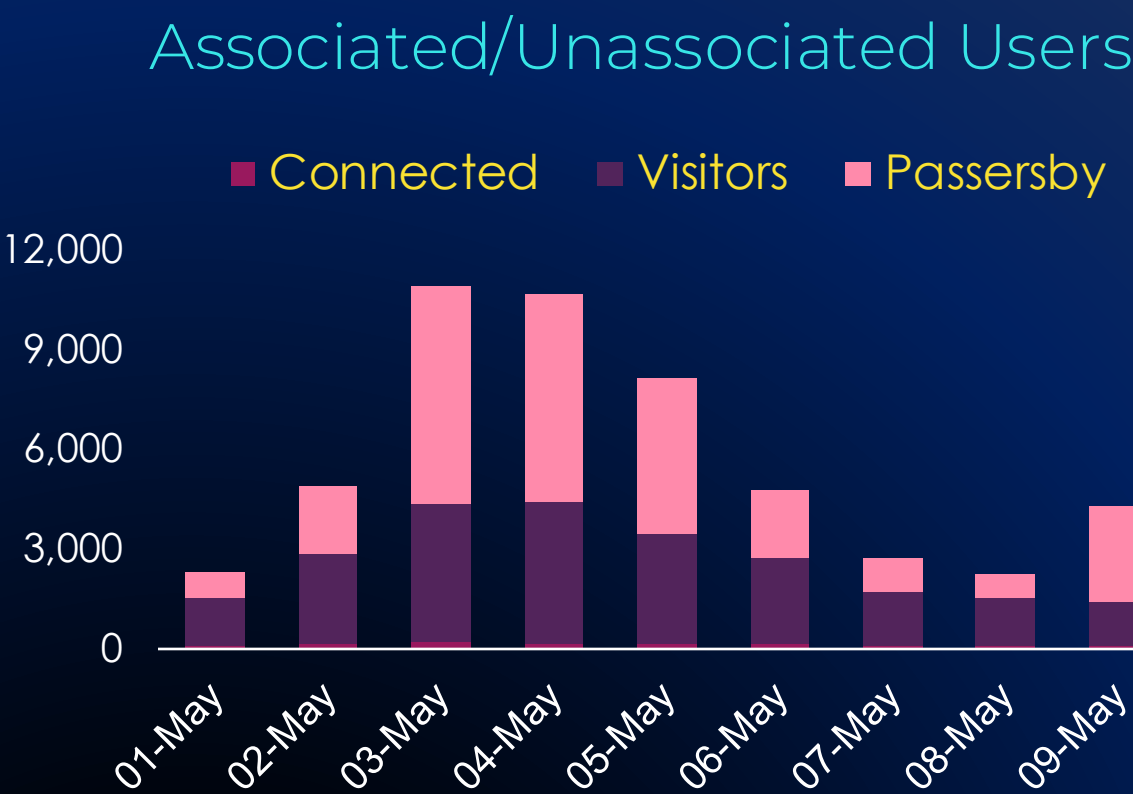

Sessions Info contains information about the Accepted/Rejected Sessions, Number of Sessions (daily, weekly, monthly, customer), Average Session Duration (daily, weekly, monthly, customer), Quota Consumption, Application Access Time and more.

Location-Analytics & Advanced BI

Hoopoe Digital's BI Dashboard contains, but not limited to, the following modules:

- Associated/Unassociated Users.
- Connected (Authenticated/Unauthenticated) Users.
- Visitors vs. Passersby.
- Capture Rate.
- Visitors Groups based on Dwell Time.
- Median Visit Duration.
- Visitors Loyalty.
- Repeat Visitor Rate.

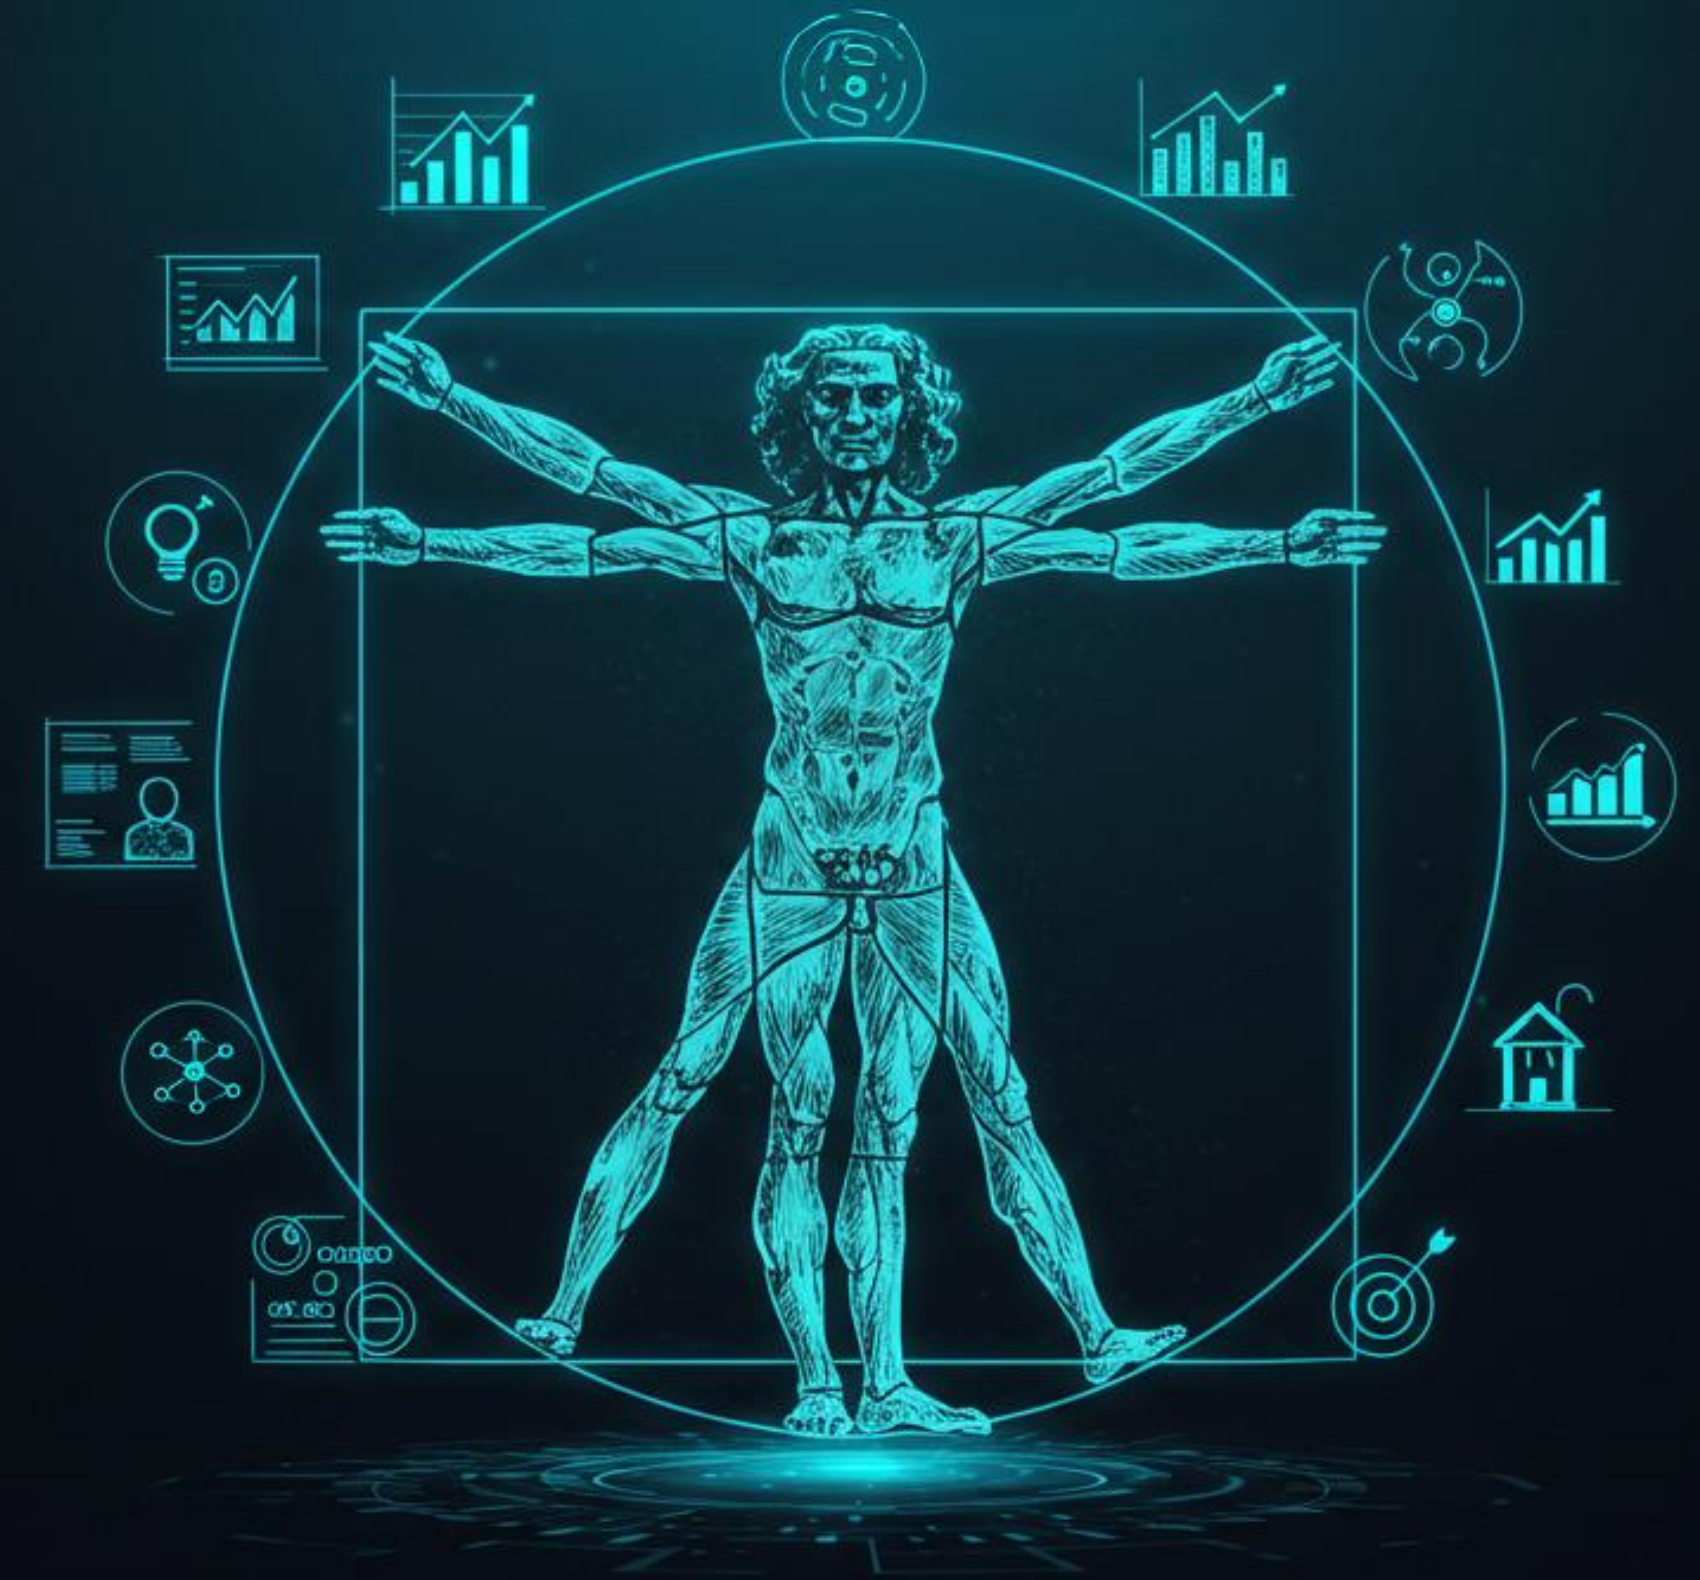

Application-Specific User Data

Hoopoe's ecosystem of Wi-Fi Instant Applications creates 360 guest profiles by gathering specialized data across touchpoints.

The Intelligent Menu captures dining preferences, while HEPLex & Jukebox record entertainment choices, at the same time Doarak knows the services you always seek. Simultaneously, our Navigator and Indoor Tracking services map physical movement patterns and location preferences.

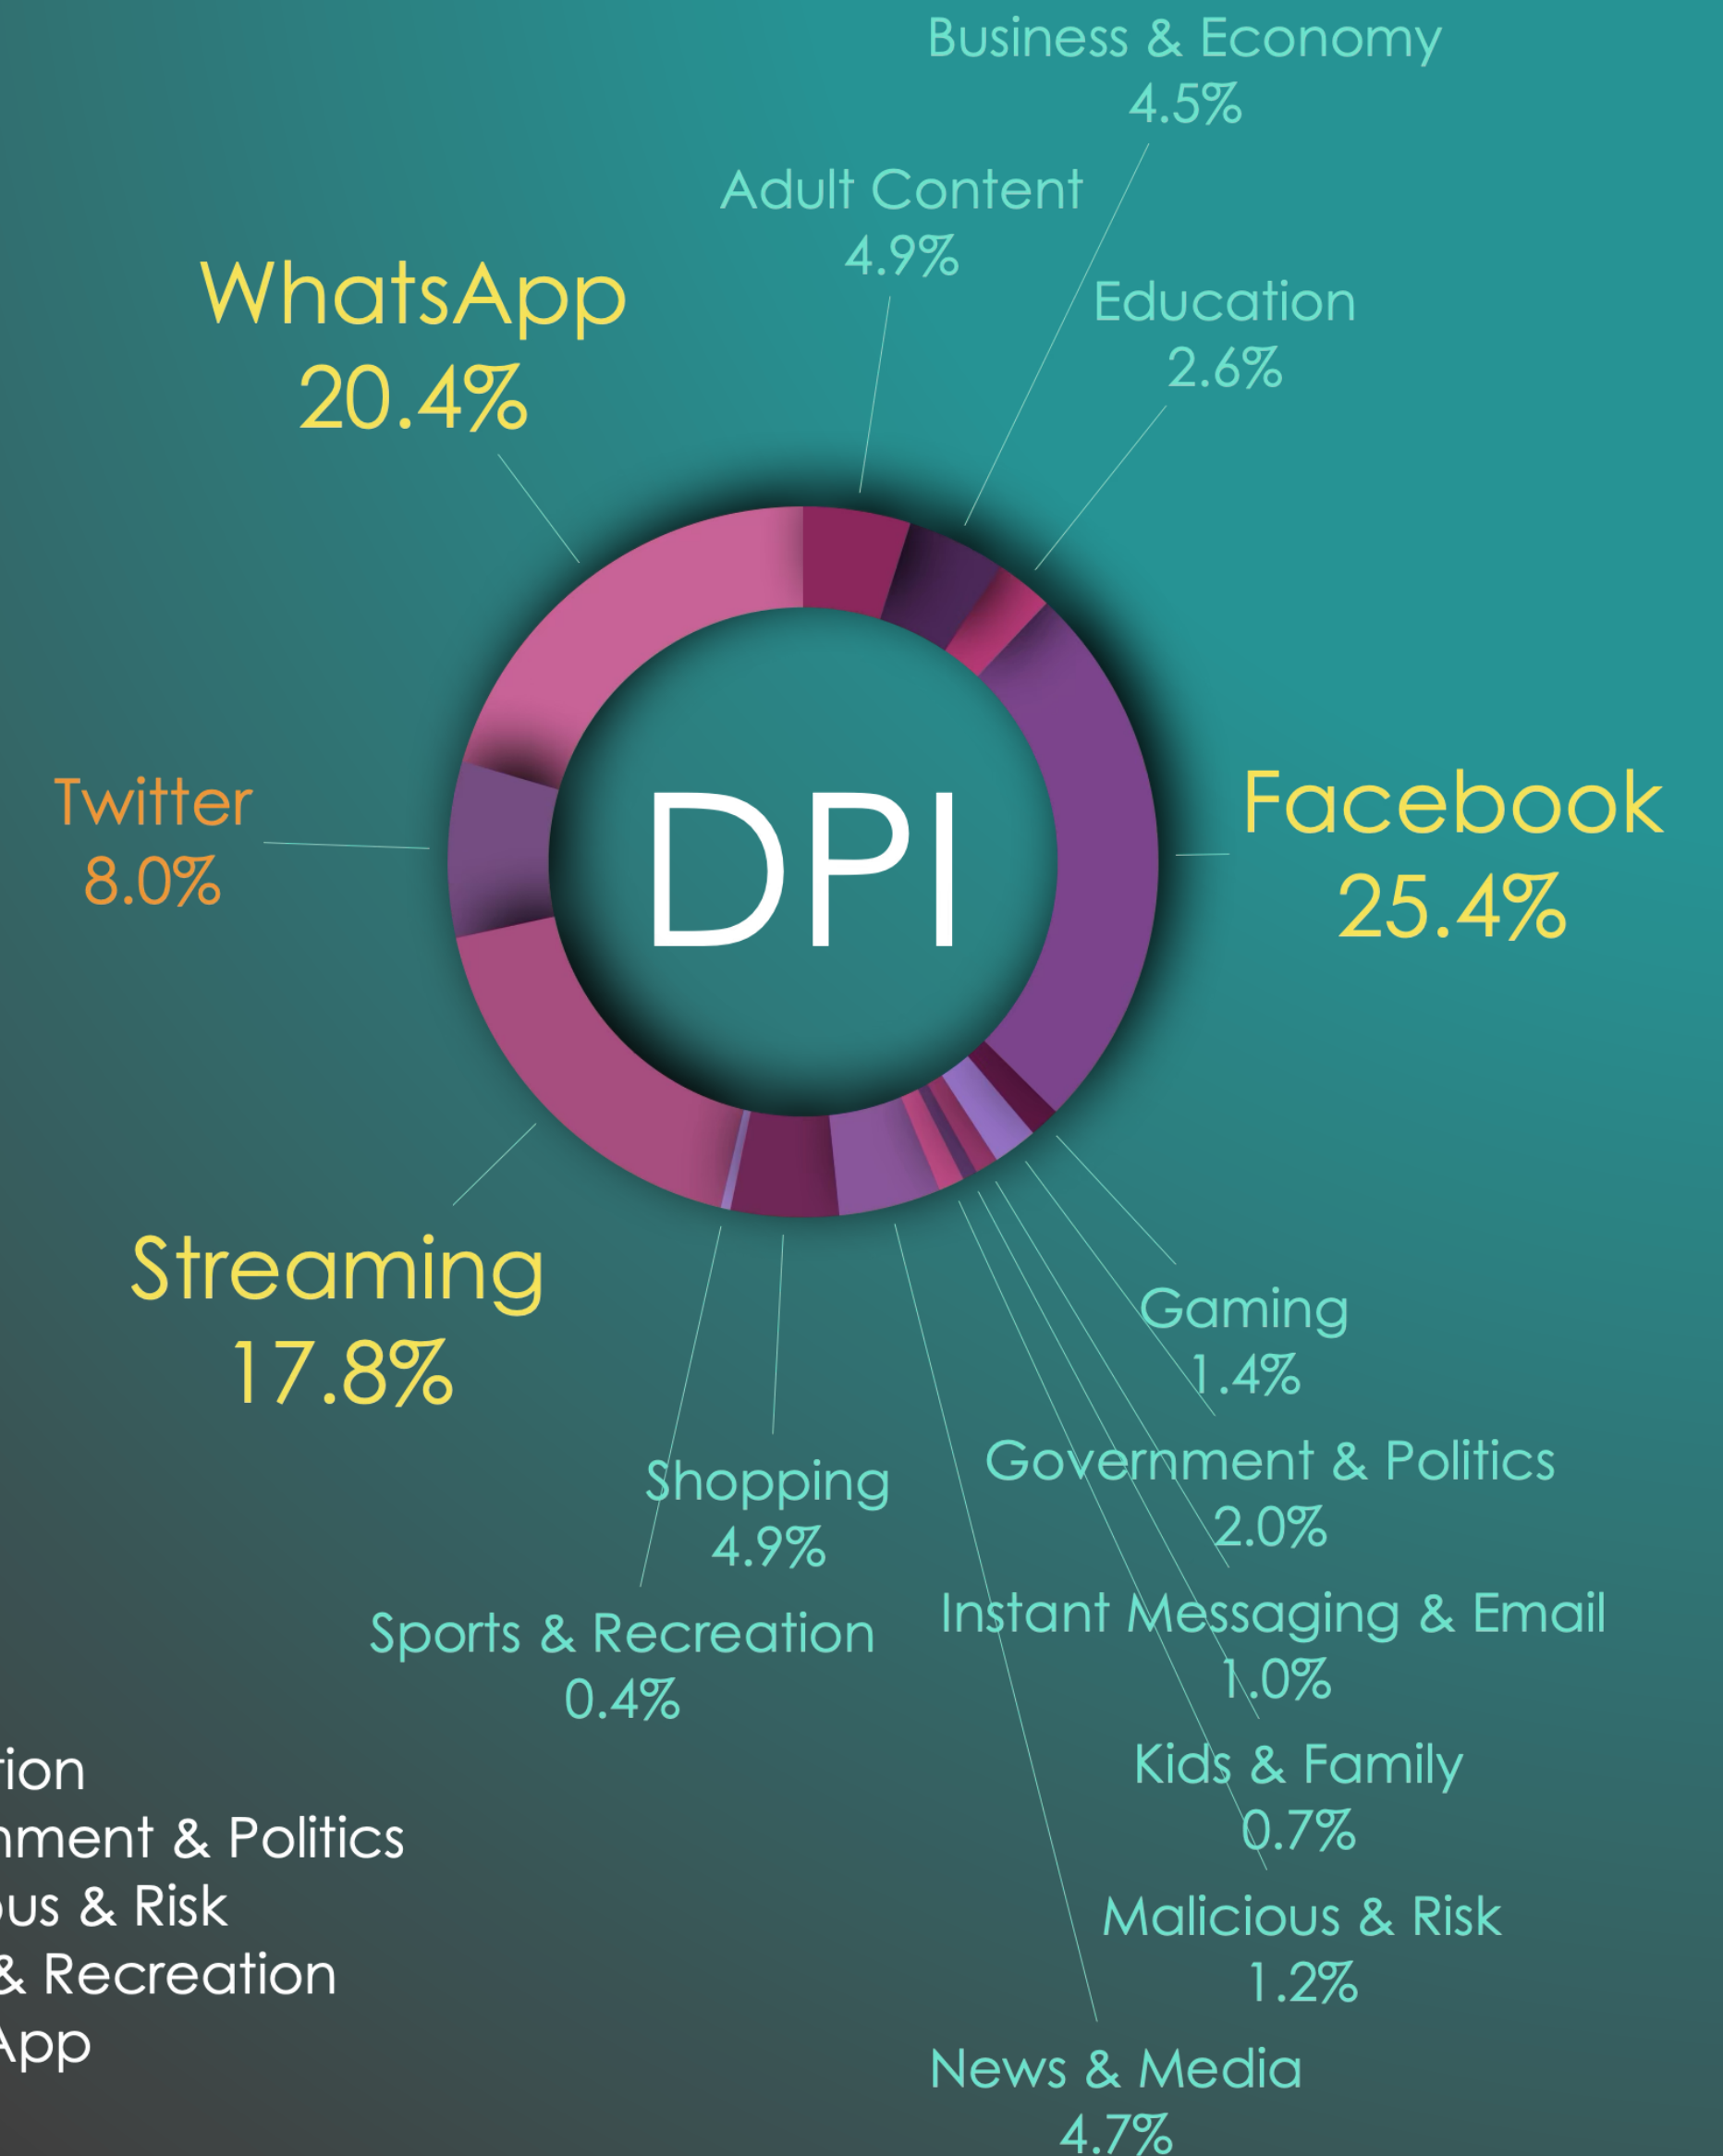

By integrating these diverse data streams, we develop holistic user profiles that reveal comprehensive behavioral patterns and enabling precisely targeted marketing initiatives and dramatically improved sales conversions.

Deep Packet Inspection (DPI)

Hoopoe Digital analyzes the online traffic of the authenticated Wi-Fi users, as part of analyzing their dynamic behavior, using Deep Packet Inspection (DPI) technology. DPI tells what applications, services, protocols users use while online. The DPI dashboard reports individual users traffic analysis as well as the overall Wi-Fi traffic analysis.

Google Analytics & Tracking Pixels

Hoopoe Digital embeds Google Tags directly within captive portals, delivering powerful analytics across all its WiFi Instant Applications. This enables accessing comprehensive user insights through the familiar Google Analytics interface—tracking session duration, bounce rates, user flow, conversion funnels, engagement patterns and demographic information without additional implementation effort.

Hoopoe selects the tracking pixel based on customer preferred marketing stack, creating a unified view of user behavior across physical and digital touchpoints. This seamless integration enhances decision-making and maximizes the marketing value of your WiFi investment.

HOPOE DIGITAL TWIN

Where All Smart WiFi Solutions Converge

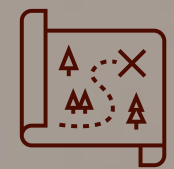

Hoopoe Digital Twin elevates the traditional Digital Twin concept into an AI-powered ecosystem for physical venues to offer visitor an immersive digital journey, empowering venue owners with sophisticated tools to monitor, manage, and control their environment automatically.

This next-generation solution bridges physical operations with digital intelligence, creating smarter spaces that enhance both visitor experiences and operational efficiency.

Hoopoe Digital Twin - Visitor Journey

A ChatGPT-like but for the Physical Venues

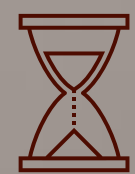

3D Digital Interactive Map — A dynamic interface for exploration.

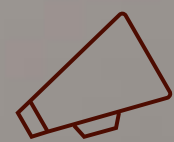

Live Navigation & Positioning — Guide visitors in real-time.

Intelligent Menus & On-Map Ordering — Search, order, and reserve with ease.

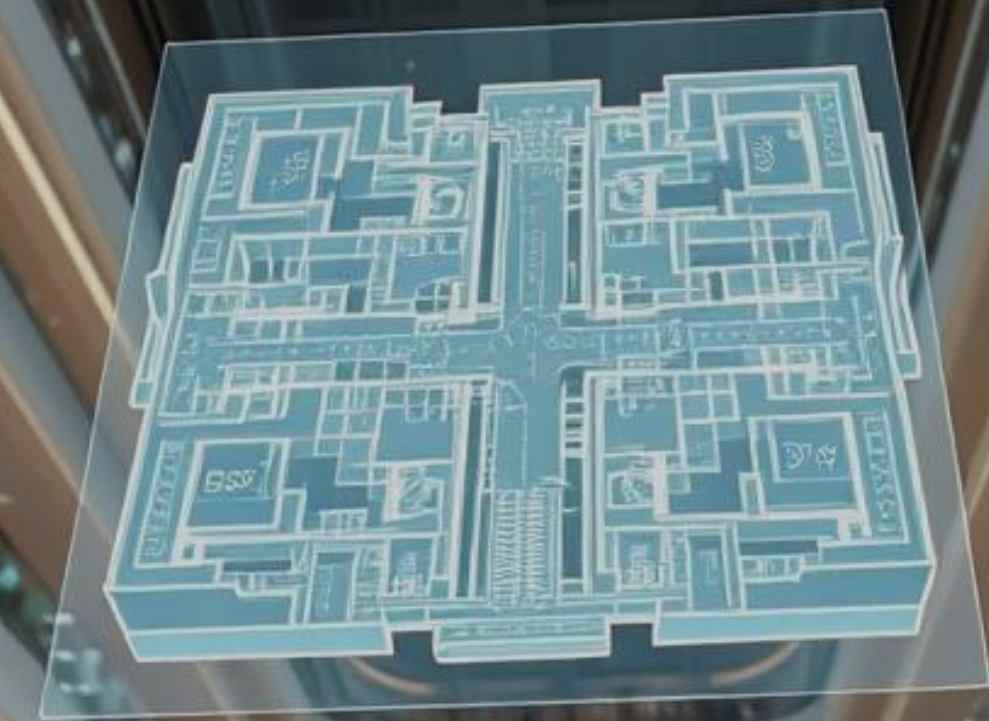

Smart Queuing & Reservations — Reduce wait times, enhance satisfaction.

On-Map Advertising & Proximity Marketing — Personalized offers where it matters.

Entertainment Suite — Jukebox, streaming, and interactive experiences.

Hoopoe Digital Twin – Operator Platform

AI-powered Operation, Monitoring and Control

Bird-eye View of Your Venue — Real-time monitoring of all activity.

Track Every Movement — Even unconnected users.

Behavioral Analytics & Flow Management — Understand patterns, predict actions.

Customer Insights — Know preferences, dislikes, and loyalty levels.

Operational Intelligence — Optimize staff, space, and services.

Monetize Data & Engagement — Turn insights into revenue.

The background image shows a high-tech retail environment. On the left, several mannequins in various suits are displayed on a raised platform. In the center, a mannequin in a light-colored suit is highlighted by a glowing red circular light on the floor. To the right, a person is seen from the side, looking at a smartphone. The floor is covered with a grid of glowing icons representing different clothing items like shirts, jackets, and pants. The overall atmosphere is futuristic and digital.

HOOPOE DIGITAL TWIN

is your venue's version of ChatGPT — instantly answering questions, guiding visitors, and managing real-life location-intelligent services within your physical space.

You walk into the mall and connect to its Hoopoe Digital Twin dedicated WiFi — instantly, it pops up on your phone with a 3D interactive map of the venue.

You ask:

"I have a business interview the day after tomorrow, recommend an outfit within my budget."

The Digital Twin responds like your personal stylist and guide — directing you to a jacket from Zara, a shirt from Hackett, pants from Harmont & Blaine, and shoes from Next. It even suggests alternative styles and shows you the total price for each option.
